

Scope of Work & Deliverables

Blog & Event Publishing Management System

Project Name:	Blog & Event Content Module	Total Cost:	₹25,000 INR
Prepared For:	Client Review & Approval	Delivery Commitment:	Within 15 Days

1. Executive Summary

This document outlines the complete functional scope of work for delivering an intuitive Blog and Event Management System. Designed specifically for non-technical users, this system enables staff to effortlessly build, format, reorder, and publish content—including articles, announcements, and events—without requiring technical assistance or code modifications.

2. Functional Features & Capabilities

1. Drag-and-Drop Content Publishing Engine

A visual page editor operating directly within your application admin panel. Content creators assemble posts block-by-block and publish instantly.

- **Visual Drag-and-Drop Blocks:** Easily add and reorder text headings, rich paragraphs, image uploaders, multi-column cards, and call-to-action buttons.
- **Automatic Clean URLs:** Every published post automatically generates a clean, search-engine-friendly web link based on the title.
- **Self-Adjusting Layouts:** Responsive structure that automatically adapts content, images, and text spacing to look clean across mobile, tablet, and desktop devices.

2. Event Management Engine

A structured publishing module dedicated to managing upcoming meetups, webinars, workshops, or public client events.

- **Event Information Management:** Structured input fields for Event Title, Date, Time, Venue/Location, Poster Image, and Registration Links.
- **Prominent Formatting:** Key details (date, time, venue) auto-format into highlighted highlight boxes on the live site.

3. What the Admin & Marketing Team Gets

DASHBOARD / INTERFACE	FEATURES & CAPABILITIES	VALUE DELIVERED
Visual Page Builder Dashboard	Block-based drag-and-drop editor. Add, reorder, or remove paragraphs, photos, and columns using visual drag handles. Includes live layout preview.	Complete editing independence without needing developers for page updates.
Publishing Management Center	Central dashboard listing all draft and live posts. Filter content by publication status (Draft vs. Published), author, and creation date.	Effortless content organization and quick editing access for team members.
Media Upload Management	Upload blog headers, inline photos, and event posters. Includes automatic image optimization to ensure fast page load speeds.	Maintains high site performance automatically when large photos are uploaded.
User Access & Role Control	Granular user permissions. Assign team members as <i>Authors</i> (ability to create and edit drafts) or <i>Editors/ Admins</i> (ability to publish live).	Ensures proper review workflows and prevents unauthorized public edits.

4. Investment & Commercial Terms

Total Scope Development & Handover Fee

Includes full functional setup, template integration, user dashboard access, and system handover within 15 days.

₹25,000
